<p>Venue: <b>Field</b> Meeting Place: <b>WCC</b></p>	<p>Presenter: <b>Lyndon Penner</b></p>
<p>Activity Level: <b>Moderate</b></p>	<p>The wild rose serves as an important symbol of Alberta, and indeed roses have been revered for centuries. There are several species of wild roses in the park, and they serve as important food for pollinators, birds, and even bears. Did you know that the rose family is very large? A great many plants that grow in the park belong here. This includes not just the roses themselves, but also chokecherries, ninebark, mountain ash, raspberries, potentilla, geum, strawberry, and hawthorn!</p>
<p>Shuttle: <b>No</b> <b>\$45.00</b></p>	<p>Join Lyndon for an informative and beautiful hike to explore the many diverse faces of this important family.</p> <p style="text-align: right;"><b>Reserve now</b></p>

<p>Venue: <b>Field</b> Meeting Place: <b>WCC</b></p>	<p>Presenter: <b>Valerie Webber</b></p>
<p>Activity Level: <b>Moderate/ Challenging</b></p>	<p>Bellevue Prairie trail is a wonderful area to explore in early spring when most of the other trails in the park are still snow-bound. This prairie zone features an abundance of wildflowers all summer long, from Shooting Star, to Balsamroot, Brown-eyed Susan, and Bergamot waving in the breeze. As soon as you step onto the trail, you are surrounded by flowers as the trail wanders through open meadows and rolling hills in the shadow of Bellevue Hill. Note: this is a 4 hour workshop, with a 4-6 km walk over rugged terrain. Bring water, a snack, rainwear, and good hiking shoes. Please note that there will be a shuttle arranged for this session.</p>
<p>Shuttle: <b>Yes</b> <b>\$55.00</b></p>	<p style="text-align: right;"><b>Reserve now</b></p>

<p>Venue: <b>Waterton Opera House</b> Meeting Place: <b>Waterton Opera House</b></p>	<p>Presenter: <b>Opera House</b></p>
<p>Activity Level: <b>All</b></p>	<p>A new look at Van Gogh, through the legacy of the largest private collector of artworks by the Dutch painter: Helene Kröller-Müller (1869-1939), who, in the early 20th Century, ended up buying nearly 300 of his works, paintings and drawings included. This is an exhibition that will not only tell us about Van Gogh's art and his genius, but it will also allow us to understand the importance of drawing as part of his artistic technique. His seemingly instinctive 'au premier coup' canvases were the result of long, preparatory studies, not sketches but complete works of art in themselves, where the broken flow of lines that characterizes the style of his paintings can already be found. (90min)</p>
<p>Shuttle: <b>No</b> <b>Adult \$10 Children \$7</b></p>	<p style="text-align: right;"><b>Reserve now</b></p>
<p><b>19:00</b> to 21:00 Duration: 02:00 h</p>	<p><b>14S Beneath the Crags of Waterton</b> <i>Category: Presentation</i></p>
<p>Venue: <b>Annora Brown Room (WCC) - Park Compound</b> Meeting Place: <b>WCC</b></p>	<p>Presenter: <b>Joyce Sasse, Anne McClelland, Tony Partridge</b></p>
<p>Activity Level: <b>All</b></p>	<p>An evening with Annora Brown: Her stories and her paintings. Annora Brown, was a Canadian visual artist whose work encompassed painting and graphic design. She was best known for her depictions of natural landscapes, wildflowers, and First Nations communities in Canada.</p>
<p>Shuttle: <b>No</b> <b>\$20.00</b></p>	<p style="text-align: right;"><b>Reserve now</b></p>

<p><b>06:30</b> to 09:00 Duration: 02:30 h</p>	<p><b>15A Early Bird Chorus - Birds of the Plains</b> <i>Category: Fauna</i></p>

<p><b>07:00</b> to 10:00 Duration: 03:00 h</p>	<p><b>15B Controlling Light for Wildflower Photography</b> <i>Category: Photography</i></p>
<p>Venue: <b>Classroom/Field</b> Meeting Place: <b>WCC</b></p>	<p>Presenter: <b>Ian Wilson</b></p>
<p>Activity Level: <b>Moderate</b></p>	<p>Join Ian Wilson, author and photographer of Wildflowers of Waterton Park and Waterton Wild, during this hands-on workshop. Learn to control light for wildflower photography with the use of reflectors, diffusers, LED lights, on-camera flash, and off-camera flash. Participants will have an opportunity to use different tools while photographing flowers. We will also review the use of depth of field to highlight your subject, the benefits of a tripod, composition and other close-up techniques. Discover how best to use light for perfect image, and benefit from Ian's years of photographic experience. Bring your digital camera, and tripod if you have one. And bring your eye for the beauty of wildflowers!</p>
<p>Shuttle: <b>TBD</b> <b>\$45.00</b></p>	<p><b>Reserve now</b></p>
<p><b>08:15</b> to 17:15 Duration: 09:00 h</p>	<p><b>15F Nature's Medicine Cabinet - From Plants to Salves</b> <i>Category: First Nations</i></p>
<p>Venue: <b>Classroom/Field</b> Meeting Place: <b>WCC</b></p>	<p>Presenter: <b>Brenda Holder</b></p>
<p>Activity Level: <b>Moderate</b></p>	<p>This workshop will take place both in the field and in the classroom and will focus on the traditional use of Plant Medicines and how they fit in our world today. You will learn plant identification and plant use, including edibles (teas, syrups) and medicines (salves, poultices, liniments); you will also learn the methods of creating these products and have the opportunity to make some to take home. We will discuss the ethics of harvesting and plant respect. All plant material will be gathered before the festival and provided for the participants.</p>
<p>Shuttle: <b>No</b> <b>\$99.00</b></p>	<p><b>Reserve now</b></p>

<p>Venue: <b>Field</b> Meeting Place: <b>WCC</b></p>	<p>Presenter: <b>Lyndon Penner</b></p>
<p>Activity Level: <b>Moderate</b></p>	<p>The blue camas (Camassia quamash) is a gorgeous plant once placed in the same family as the lilies, but now recognized as a member of the hyacinth family. With blue to purple (or rarely white) flowers, it likes moist places and flowers in early summer — hopefully just in time for the Wildflower Festival! Revered by indigenous people for thousands of years as a food plant, it is now mostly cherished for the beauty of its blossoms. Beth and Andy Towe, long time Waterton residents, have graciously given us permission to traipse across their land where blue camas grow in abundance. Join us for a wonderful journey where history and botany collide. Please note that there will be a shuttle arranged for this session.</p>
<p>Shuttle: <b>Yes</b> <b>\$50.00</b></p>	<p><b>Reserve now</b></p>

Come and learn about the science of breathing and how to return to your natural state of correct breathing. The “complete breath” can be practiced anytime, anywhere while sitting, standing, walking or lying down. With a few minutes of practice a day, you will experience increased vitality and peace of mind. Mary Ann will guide you through a series of simple exercises, to breath more fully and completely. Gentle stretching of all body parts, synchronized with the breath, will ready you for your wildflower adventures. Come in your hiking gear or as you are dressed for the day. We will be doing all the exercises and stretching either sitting or standing with a chair, outside on the Waterton Community Centre grounds, weather permitting. If the weather is inclement, we will be inside! Suitable for all - teens to twilight years!</p> <p style="text-align: right;"><b>Reserve now</b></p>

<p>Venue: <b>Classroom</b> Meeting Place: <b>WCC</b></p>	<p>Presenter: <b>Lyndon Penner</b> For centuries, gardeners, scientists and naturalists have sought to collect, identify, and name new species for science. The Latin system of botanical nomenclature has served very well, but what happens now when plants start being divided and re-named? How is one supposed to keep up with this sudden flood of name changes to well known plants and who are the people that are making these decisions? Why are plants formerly placed in one family now suddenly in another? Join Lyndon for a fascinating investigation of the who and why behind NEW scientific names, why plants are being reclassified and moved around, and whether or not this is a good idea or a bad idea!</p>

This is an exhibition that will not only tell us about Van Gogh's art and his genius, but it will also allow us to understand the importance of drawing as part of his artistic technique. His seemingly instinctive, 'à la premier coup' canvases were the result of long, preparatory studies, not sketches but complete works of art in themselves, where the broken flow of lines that characterizes the style of his paintings, can already be found. Many people know that fire serves as a natural means of control for pests and diseases, but did you know that there are many places in the world where fire is the most important and the most critical factor determining what species live and what species don’t? California, Australia, and parts of Africa are all considered “fire based ecosystems”. Some plants require smoke in order for their seeds to germinate. Some plants need fire to clear out the competition so they can colonize. In other places, fire is necessary in order to keep grasslands from turning into forests. Join Lyndon for an enlightening and entertaining examination of what sort of intentions fire actually has, and what fire is thinking about when no one is watching.</p> <p style="text-align: right;"><b>No Reservation</b></p>

<p>Activity Level: <b>Moderate</b></p>	<p>The blue camas (Camassia quamash) is a gorgeous plant once placed in the same family as the lilies, but now recognized as a member of the hyacinth family. With blue to purple (or rarely white) flowers, it likes moist places and flowers in early summer- hopefully just in time for the Wildflower Festival! Revered by indigenous people for thousands of years as a food plant, it is now mostly cherished for the beauty of its blossoms. Beth and Andy Towe, long time Waterton residents, have graciously given us permission to traipse across their land where blue camas grow in abundance. Join us for a wonderful journey where history and botany collide. Please note that there will be a shuttle arranged for this session.</p>

# Meet the Presenters

**Alan Dyer** is an author of several books, and associate editor of SkyNews, Canada's magazine of stargazing, and a contributing editor to Sky & Telescope magazine. His photos and videos have appeared on Spaceweather.com, National Geographic, CBSNews and more. The main belt asteroid #78434 is named in his honor. [www.amazingssky.com](http://www.amazingssky.com)

**Barry Adams** is recently retired Head of Rangeland Resource Management for the Environment and Sustainable Resource Development Department of the Alberta Government, in Lethbridge. He is currently a private rangeland consultant. While with the Government he was responsible for a team of 9 rangeland management specialists who work across the province of Alberta to assist ranchers in applying the principles and practices of range management to promote healthy range and sustainable livestock operations.

**Brenda Holder** is a Professional Interpretive Guide, Interpretive Guide Group Management Instructor, First Aid instructor, and Keeper of her Medicine Lineage. She takes great pleasure in sharing the knowledge that she has researched and gained through talking to elders about the rich Métis traditions of her heritage. Brenda offers Native Medicine classes in Canmore, Alberta.

**CPAWS** The Canadian Parks and Wilderness Society (CPAWS) is Canada's voice for wilderness. Our 13 chapters nationwide are working to protect Canada's public lands and waters. Since 1967, the Southern Alberta Chapter of CPAWS has been dedicated to protecting the ecological integrity and connectivity of the southern Alberta landscape, as well as increasing environmental awareness and engagement among Albertans. Without CPAWS SAB, our national parks would look very different than they do today and we wouldn't have areas like Kananaskis, the Whaleback and the Castle. We are the leading chapter in environmental education and have won provincial and national awards for our programs. During the past 20 years, CPAWS SAB has engaged over 120,000 participants in environmental education.

**Ian Wilson** has spent many years exploring and photographing northern Canada. His photographs have appeared in many books and magazine across the country. His most recent books are Waterton Wild, Wildflowers of Waterton Park, and Wildflowers of Banff Park. Ian has also written five bestselling outdoor adventure books. He is now pursuing his passion of photographing wildflowers and wildlife. When he's not wandering in the mountains, Ian lives in Canmore, Alberta.

**Jacinthe Lavoie** has been a flower-bug since her childhood days. With training as a researcher, she has observed and enjoyed nature through each season. Her most recent books are Waterton Wild, Wildflowers of Waterton Park, and Wildflowers of Banff Park. Jacinthe has also written twelve educational books. She is now fulfilling her dream of writing about wildflowers and painting their beauty in watercolour. During the seasons when flowers are dormant, Jacinthe lives in Canmore, Alberta.

**Joe Desjardins** works as a professional photographer out of the Calgary, Alberta region, focusing mainly on wildlife and landscape photography. He spends a lot of his time sharing his knowledge and enthusiasm through teaching, workshops and speaking engagements. Joe is an award-winning and nationally published photographer that has garnered multiple national accreditations in a variety of disciplines including equine, landscape, nature, wildlife and more. Joe has also garnered the designation of Master Photographer (MPN) in Nature Photography with MPIO, Master Photographers International.

**Joyce Sasse** For the past years Joyce Sasse has been working with a goodly number of South Alberta volunteers to bring the almost forgotten story of Annora Brown back to life. Identifying her legacy is now recognized to be significant by the likes of Parks Canada, programs in Lethbridge College and University, through initiatives to have her work published (and re-published) and by sharing her story through various forms of media. See [www.annorabrown.ca](http://www.annorabrown.ca) .

**Julie Strong** grew up on a ranch in Mountain View and has always loved spending time in the great outdoors. At an early age she had a love for drawing and art was one of her favourite subjects in school. She attended Grant McEwan Community College in Edmonton in the Commercial Arts Program, and has always enjoyed the creative process. Watercolours are her medium of choice and the mountains in Waterton Park have been a constant source of influence and inspiration.

**Kim Pearson** works as an Ecosystem Scientist for Parks Canada coordinating grassland restoration, wildlife movement and species at risk projects, among others. She collaborated for ten years on the Nature Conservancy of Canada's neighboring Waterton Park Front Project and has consulted on various projects for organizations such as the Southern Alberta Land Trust Society, Alberta Fish and Wildlife and Canadian Wildlife Service. Kim has been identifying birds by ear for nearly twenty years; it is a practice she honed while conducting point counts for Parks Canada prior to the advent of digitized surveys. She and her family are proud to call the Waterton area home.

**Lyndon Penner** grew up in rural Saskatchewan and has spent all of his time and energy on gardening since he was very young. He started working in the horticulture industry at the age of 16, and now writes, lectures, and teaches all over western Canada. When he is not pulling weeds in the garden or tromping all over the mountains in search of some obscure wildflower, Lyndon likes to spend time with his nephews or sitting quietly somewhere with a good book to read and a cup of coffee. His passion for Canada's native plants is what first brought him to Waterton and he is thrilled to be your guide to some of the country's most beautiful flowers.

**Mary Ann Reeves** is a Certified Yoga Teacher and Yoga Therapist (CYT 500, Yoga Studio College of Canada) and a lifelong Watertonite and lover of Waterton Wild Flowers! For more information contact Mary Ann at [watertonite@icloud.com](mailto:watertonite@icloud.com)

**Robert Dale Rogers** has been an herbalist for over forty-five years, and is a professional member of the American Herbalist Guild. He earned a Bachelor of Science from the University of Alberta, where he is presently an assistant clinical professor in Family Medicine. He teaches plant medicine, including plant and mushroom medicine, aromatherapy and flower essences in the Earth Spirit Medicine faculty at the Northern Star College in Edmonton, Alberta, Canada. He is a Fellow of the International College of Nutrition, past-chair of the medicinal mushroom committee of the North American Mycological Association and on the editorial boards of the International Journal of Medicinal Mushrooms, Fungi magazine and Discovery Phytomedicine. He is the author of 50 books on medicinal plants and fungi of the boreal forest.

**Roger Riis** Since learning about Mason Bees a few years ago Roger has spent a lot of time researching the effects of pollination on our environment. He takes great interest in teaching about pollination to all that show interest. He especially enjoys talking to younger people because they are the ones having to deal with mistakes made by his generation.

**Ron McNeil** is a soil and land resource scientist who specializes in natural resource inventories, ecological land classification, soil survey and interpretative products from inventories. Ron was instrumental in developing the link of soils and ecological range sites to native plant communities, which has been valuable for habitat management and species at risk. Ron also helped develop the 2010 reclamation criteria for native grasslands and cultivated lands in Alberta.

**Dr. Roy Golsteyn** is an Associate Professor of Biology and the Director of the Cancer Cell and the Natural Product Laboratories at the University of Lethbridge in Canada. He undertook his PhD in biochemistry in Sir Tim Hunt's laboratory (Nobel Prize 2001) at the University of Cambridge. Roy completed his studies as a research fellow in Switzerland, and the Institute Curie in Paris. Prior to joining the University of Lethbridge, he was a senior research scientist in drug discovery with a pharmaceutical company in France. He has published more than 80 scientific papers and holds 5 patents. Roy was born and raised in Lethbridge and has always been fascinated by plants and animals of the great outdoors.

**Valerie Webber** is a studied lover of everything floral with a repertoire of over 500 wildflower species. Valerie is also a gardener for hire and is involved with invasive species control.
